

Single Seat License
for connectivity to
multiple XL devices

\$995 USD

XL Bolt-On OPC Server +

Multiple Challenges:

Do you need to:

- Move data automatically between your Vorne XL Productivity Appliance and your PLC's?
- Bridge your MES to the Vorne XL Productivity Appliance for data interaction?
- Automatically page when production stops or attention is needed on a production line?
- Combine and totalize information from several lines or areas to one display?

One Solution:

The XL Bolt-On OPC Server! This OPC Server handles all communication with the Vorne XL Series Productivity Appliances, so that you can read and write data values using your favorite OPC client tools for bridging, paging, visualization, etc.

Features and Benefits:

- Simple configuration - Supply IP address and device name
- All available data items pre-defined – no more “building tags”
- Supports multiple XL Devices – one or many on a network
- Data Link for XL to XL communications INCLUDED!
- Simulation Mode – configure and test without device present
- Built-in tag explorer – no more guessing at tag syntax or typos
- Communication Statistics – troubleshoot communication
- Simple Licensing – file key
- Free Demo Runtime!
- FAST!
